DETAILED ACTION

Allowable Subject Matter

1. Claims 1-34 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention was directed toward a device for decoding a disc read signal generated by accessing data stored in a disc storage medium. Independent claims identify the distinctly unique features, "a confidence index generating circuit for generating a plurality of confidence indexes according to the magnitude of the digitalized disc read signal." The closest prior art fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
